PROFESSIONAL SUMMARY

DevOps Engineer with 1+ year of experience and strong foundation in software deployment/systems administration. Proficient in various DevOps tools and practices, including continuous integration/continuous deployment (CI/CD) using **Github Actions**, containerization with **Docker**, IAC with **Terraform**, **Azure** and **AWS**.

SKILLS

Programming Languages: Python | C++ | C | JavaScript | SQL | Java | Bash
Libraries/Frameworks: Node.js | Spring Boot | .NET
Tools / Platforms: VS Studio | Power BI | Git | Microsoft Office | Jenkins | Docker | SonarQube | Docker | Azure | AWS | Ansible | Terraform
Database: MySQL | MongoDB | PostgreSQL | Grafana | GitHub
Operating System: Ubuntu | Windows

ACADEMIC QUALIFICATIONS

Manipal University Jaipur	Jaipur, Rajasthan
Masters of Computer Applications	July 2024 - Aug 2026
CGPA: 8.75	
Chandigarh University	Mohali, Chandigarh
Bachelors of Computer Applications	July 2021 - July 2024
CGPA: 8.53	

WORK EXPERIENCE

CustomerInsights.AI Devops Engineer	On-Site Aug 2024 - Present
Secure GenAI Architecture: Architected a "Zero Trust" platform using Azure Container Apps and Azure Front Door Premium, ensuring strictly private connectivity for AI workloads via Private Endpoints. Infrastructure as Code (IaC): Managed enterprise cloud infrastructure by creating modular Terraform scripts for the automated provisioning of VNets, Container Environments, and Database clusters. Multi-Cloud Observability: Designed a centralized monitoring and visualization framework using Azure Managed Grafana backed by Azure Log Analytics Workspaces, while leveraging AWS CloudTrail for cross-cloud auditing and security governance. CI/CD & Release Strategy: Engineered GitHub Actions pipelines to automate deployments, successfully managing promotions across isolated environments (Dev, Staging, Production). Hybrid Model Integration: Configured secure outbound traffic via NAT Gateway to consume external APIs (Google Gemini) while keeping internal resources locked down. Multi-Cloud Parity: Translated complex enterprise patterns from AWS (ECS Fargate, CloudFront, Bedrock) to Azure, demonstrating versatility in cloud-agnostic design.	
Pearl Thoughts DevOps Engineer Intern	Remote Jun 2024 - Jul 2024
- Developed an application using Strapi and implemented CI/CD pipelines through GitHub Actions, streamlining the deployment process. - Utilized Terraform to dynamically set up the infrastructure and Dockerized the application for deployment via AWS Fargate and ECS. - Automated testing and deployment workflows to enhance software delivery performance.	

PROJECTS / OPEN-SOURCE

Counter Service Link	GitHub, Sonar Cloud, Snyk, AWS Services
Developed and upheld a website featuring a counter service utilizing Python, which monitors and presents the cumulative count of POST requests received, with the count being refreshed upon each GET request.	

- Orchestrated seamless **CI/CD** pipelines utilizing **ECS, ECR, Dockerfile, and GitHub Actions**, ensuring that upon committing and pushing changes, the code successfully passes through **Continuous Integration** and **Continuous Deployment** pipelines. This culminates in the deployment of a **Docker** container on an **EC2** instance, **automating 90%** of deployment tasks and achieving streamlined release cycles while enhancing **system reliability**.
- **Technology Used:-** EC2, ECR, Docker, Github Actions, Snyk, Sonar Cloud

Multitier Web Application | [Link](#)

Linux, Vagrant

- Designed a robust **Linux**-based infrastructure to support multi-tier web applications which is done through **Vagrant**; with enhanced system **reliability** and reduced **downtime** by **20%** through strategic resource allocation and **load balancing**.
- Established and meticulously configured diverse **server** environments to support the implementation of **microservices architecture**, ensuring optimal **performance** and **scalability**.
- **Technology Used:-** Vagrant, Memcache, Linux, Rabbitmq, Nginx, MariaDB.

Employee Management System | [Link](#)

Java, Spring Boot

- Build and deployed an advanced employee management platform with **Spring Boot REST APIs** which works as a backend, optimizing **CRUD** operations while using **ReactJs** and **NodeJs** for the frontend.
- **Technology Used:-** ReactJs, NodeJs, Spring Boot, Hibernate, MySQL.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals - [Microsoft](#)
- DevOps for Enterprise Business Agility - [IBM](#)
- DevOps Engineering - Planning to Production - [GeeksForGeeks](#)
- KodeKloud Engineer - Docker (Level 1) - [KodeKloud](#)
- KodeKloud Engineer - Cloud (Azure) (Level 1) - [KodeKloud](#)
- KodeKloud Engineer - Cloud (AWS) (Level 1) - [KodeKloud](#)
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate - [Oracle](#)
- Postman API Fundamentals Student Expert - [Postman](#)
- 30 Days Of Google Cloud - [GDSC Chandigarh University](#)

HONORS & AWARDS

- **GDSC Cloud Lead:** Instructed over **500 students** on evolving trends in cloud technologies. I have also coordinated several workshops aimed at familiarizing students with various cloud providers and their respective services, providing them with hands-on experience.
- **Design-O-Tech Club:** As the President of the Design-O-Tech Club, I spearheaded a team of 5 members in organizing numerous events and workshops across the department, attracting participation from over **80 students**.
- Scored 6th position in Inter College Hackathon
- Scored 2nd position in Android Fest organized by UIC (University Institute Of Computing) at Chandigarh University
